ABOUT ME

Front End Developer with 5 years of experience creating sophisticated user interfaces and refining front-end architecture. Experienced in Agile Development and startup environments, with a strong ability to elicit and translate requirements into impactful solutions. Ready to contribute to a forward-thinking, design-oriented company by leveraging my skills to elevate user experiences and drive the success of innovative web applications.

WORK EXPERIENCE

FRONT END DEVELOPER - HULER

2021 - Current

Ranked as the top contributor to the Huler SaaS front-end repository, driving key enhancements and features.

Collaborated closely with cross-functional teams to translate complex feature requirements into actionable technical plans and solutions.

Engineered advanced user interfaces with React.js, Next.js, and Vue, delivering seamless and intuitive experiences.

Transformed custom designs into dynamic, interactive experiences using animation libraries like Framer Motion and React Spring.

Led the transition from JavaScript to TypeScript, significantly enhancing code quality, maintainability, and developer productivity.

Improved page load times by 28% through strategic implementation of caching and minification techniques.

Effectively managed tasks and communicated progress using Jira, ensuring project milestones were met efficiently.

SOFTWARE DEVELOPER - DISTINCTION

2020

Maintain strong client relationships by promptly responding to support tickets, providing timely updates, and discussing potential new features with retainer clients.

Execute bug fixes and develop new features across various platforms, including Kentico CMS, WordPress, and Vue.js, ensuring high-quality results.

Collaborate with the project manager to plan and prioritise high-impact projects, leveraging Jira for effective project management.

Led the creation of detailed user stories to guide the development of impactful and client-centric projects.

APPRENTICE DEVELOPER - SI DIGITAL

2018 - 2020

Efficiently manage and structure requirements within an agile environment, ensuring clarity and alignment across teams.

Develop accessible user interfaces that adhere to design specifications using WordPress, React.js, Gatsby, and Next.js.

Design and optimize MySQL databases tailored to the unique needs of each website, ensuring robust performance and scalability.

Seamlessly integrate new features into existing websites, enhancing functionality without disrupting user experience.

Build RESTful API endpoints for efficient data retrieval and storage, supporting smooth and scalable interactions.
